August 2023**Location:** Sancton Wood School,
Cambridge

In our Medicine course, students will develop practical skills, medical knowledge and English language ability as they start their journey to becoming a doctor, or work in the health industry. Additionally, students will receive practical advice on studying Medicine at university, as well as taking part in full First Aid training during the course. Beyond medical theory and practice, we look at the role of Medicine in a wider, ethical context to develop students' critical thinking skills and understanding of important issues in public health.

SAMPLE TIMETABLE

MEDICINE

INDUSTRY EXPERIENCE

A highlight of our academic programme is our **Industry Experience** afternoons, where students take part in a series of workshops and lectures led by top industry professionals and academics in their respective fields. The Industrial Experience element of our courses provides a profound level of insight so that students can further make informed decisions as to whether their future career choices are right for them. Our College students will be introduced to a real-world professional environment in their chose field of study, where they will absorb knowledge through workshops, lectures and Q&As.

Gain insight into the real working experience of professional doctors and healthcare professionals with our on-site visits during the Medicine Industry Experiences. A must-have experience for any future Medicine student!
