PSYCHOLOGY

TIME TO SHINE

Time to Shine: *Psychology in Practice: Experimental Psychology and Neurodiversity*

Time to Shine description: Do colours affect the way we think? What is the limit of short-term memory? Does music improve our ability to study? Do people experience phenomena in exactly the same way? In Cambridge College's Psychology *Time to Shine* project, students will devise and develop fun and engaging behavioural psychological experiments which will reveal how the mind can be influenced.

What you'll learn

- Develop an understanding of the major fields of study within the scope of Psychology.
- Learn about how Psychology is used in a variety of fields, such as sociology, marketing and healthcare.
- Develop a theoretical and practical understanding of the techniques used in clinical Psychology, including neuropsychology.
- Take part in our exciting *Psychology in Practice Time to*

Shine project, in which you and your classmates will produce a series of behavioural experiments to discover how the mind can be affected by subconscious factors.

- Through fun and engaging lesson activities, develop and apply your 21st century skills, such as critical thinking, communication skills, collaborative skills, and original thinking.

PSYCHOLOGY

INDUSTRY EXPERIENCE

A highlight of our academic programme is our **Industry Experience** afternoons, where students take part in a series of workshops and lectures led by top industry professionals and academics in their respective fields. The Industrial Experience element of our courses provides a profound level of insight so that students can further make informed decisions as to whether their future career choices are right for them. Our College students will be introduced to a real-world professional environment in their chose field of study, where they will absorb knowledge through workshops, lectures and Q&As.

In partnership with **The Medic Portal**, our Psychology students will learn how Psychology can be used in clinical medical healthcare, and how psychologists can contribute to the mental health and wellbeing of patients.
